Gimp Update Error 4.x InRelease changed its Label value from gimp to gimp stable

« **on:** October 01, 2019, 09:01:05 PM »

Level: Serious

Affects: Everyone on Series 4.x **only** that still has the Gimp PPA.

If you get the following error with Install Updates:

Reading package lists...

E: Repository '<http://ppa.launchpad.net/otto-kesselgulasch/gimp/ubuntu> bionic InRelease' changed its 'Label' value from 'gimp' to 'gimp stable'

Apply the following fix:

Open a Terminal, do:

Code: [\[Select\]](#)

```
sudo apt-get --allow-releaseinfo-change update
```

ignore any errors relating to **gimp**.

Now run **Install Updates** as per usual.

Pinned.. Kept at the top of the feed...

"Important"

Will remain at the top of the comments - regardless of activity...

Was thinking of a way to keep in the forefront.. Being the 1st weekend since Gimp made their change, might see an influx of folks running updates...

Can't pin it on the front page, could make it the News banner. Social Media announcements also were made and I originally Stickied it here. You will always get people who will post, and not read any announcements, anywhere. Can't be helped.
