## Benefits of Upgrading your Computer Memory

---

### Upgrading is Easy - Go to the Maximum

---

If you can change the batteries in your remote control, you can upgrade your memory too! It really is that simple!

The files and programmes on your device are stored on the Hard Drive or Solid State Drive, not the RAM - so you will not lose anything when replacing modules.

### Speed & Peak Performance

---

- Maximise efficiency
- Optimise the speed of your operating system and programs
- Improve the start-up time of your computer
- Run data-intensive programs with ease
- Faster & smoother overall performance

### Simple, Quick & Easy

---

- Easy as 1,2,3 (Order > Receive > Install)
- Upgrading your computers memory is simple with our easy to follow installation guides & videos
- Free support provided by our friendly Memory Experts should you need help
- Upgrade your computer in less than 5 minutes

## Big Savings

---

- Don't waste money on a new machine when you can extend the life of what you have!
- Save money on unnecessary installation costs by upgrading yourself
- Increasing your computers memory will give you the biggest performance increase for your money
- Save hours of lost time waiting for your computer to load
