# NetBeans

**NetBeans** is a free and open-source IDE that is written in Java and used for writing applications in C, C++, HTML5, Java, JavaScript, PHP and more.

## 🪛 Installation

To install NetBeans on Fedora merely install Java with:

```
sudo dnf install java-1.8.0-openjdk
```

and go to the downloads page of NetBeans and download the Linux shell script installer. Then mark it as executable (with `chmod +x` ), and run it.
