How can I set XOrg as a default on Fedora 25?

4

fedora25   xorg   wayland-session

Hi there, since Fedora 25, the default Gnome Session is based on Wayland.

Because my Backup Solution Areca (www.areca-backup.org) doesn't work properly on a Wayland based Gnome Session, I need to use the fallback to XOrg.

I know, I can choose Wayland or XOrg during the Login. But how can I use XOrg during **Automatic Login** and still have the option to choose Wayland after a logout?

thx

PS: This is the Areca Bug Report: https://sourceforge.net/p/areca/bugs/...

Edit `/etc/gdm/custom.conf` and add `DefautSession=gnome-xorg.desktop` to the [daemon] section.

First time here? Check out the FAQ!

For example

```
# GDM configuration storage

[daemon]
# Uncoment the line below to force the login screen to use Xorg
#WaylandEnable=false
DefaultSession=gnome-xorg.desktop

[security]

[xdmcp]

[chooser]

[debug]
# Uncomment the line below to turn on debugging
#Enable=true
```

You can also change `WaylandEnable=false` to true to disable using wayland for the gdm login screen. I'm not 100% sure if it changes the default gnome session to X as well.

Comments   link

thx, activating `WaylandEnable=false` did the job. Now, the default is XOrg and the choice on the login screen is still there. Adding `DefaultSession=gnome-xorg.desktop` wasn't necessary.
